

## CV19 FAQs 14th June 2021

**We have been advised that one of our students has tested positive on a lateral flow device for Covid-19.** Below are some answers to frequently asked questions.

### **How many cases of Coronavirus have been confirmed?**

Only one case has been confirmed by a LFD test. They did not attend the academy during the infectious period. We have followed a comprehensive track and trace and identified all students who have had contact with the new confirmed case, either in lesson or at social times. A further one student has been asked to self-isolate.

### **Which year group is affected?**

The case is in Year 9 and is contained within Years 9 and 10.

### **Have the classrooms been cleaned?**

We know that the virus can possibly hang around on surfaces for up to 72 hours so Year 9 classrooms, social areas, toilets and regular touch points will be cleaned again today. This is in addition to the thorough cleaning that already happens in school.

### **Why isn't the academy closing?**

At this stage, we only have one case within this bubble and we have been able to identify all the contacts that person had very quickly; they will all self-isolate for 10 days as a precaution. The advice is to open the school as planned with all the systems of control in place such as hand washing, good respiratory hygiene, enhanced cleaning and protected groups. We will also continue to ask all visitors inside school to wear a face covering.

### **How do I know if I came into contact with the infected person?**

As we keep a record of what contacts are made we know who came into contact with the infected person and have notified those who need to self-isolate as a precaution.

### **Why are there up to 30 students in a class?**

School classes will return to normal, which for us will be up to 30 students per class. We would not be able to have classes of 15 and have everybody back full time. The government guidance is clear that schools are not allowed to have part-time provision or a rota in place, and that students are able to sit next to each other in lessons.

### **If we have been in contact with a parent/child that has been asked to self-isolate by the school, are we also required to self-isolate and then track those we have subsequently had contact with also?**

No, the advice to self-isolate from PHE is only for those who had direct contact. If you develop symptoms then you should self-isolate along with your household and let us know.

### **Is it safe for students to go to school?**

We have followed a comprehensive track and trace and identified all students who have had contact with the confirmed case, either in lesson or at social times. There is no reason at this stage to suggest any other children or year groups are affected and the year group bubbles are operating as normal.

### **Will it be better to keep the children home a bit longer until this episode is over?**

Due to the systems in place we have been able to quickly identify those who came into contact with the infected person, and have been advised that it is safe for school to be open – only those students asked to self-isolate need not attend.

**If the people that have been asked to self-isolate get tested and it comes back negative, are they allowed back into school before the 10 days is up?**

No. Students have to isolate for the full period requested if asked to do so and testing is only required if students develop symptoms. If the isolation period changes, for example as a result of a negative confirmatory PCR test, we will update those affected.

**Can you confirm more details of the infected person?**

As you might expect I am not able to release any further details of the person(s) in respect to their privacy. As explained above we know who this person was in contact with and they have been informed and will self-isolate.

**I want to keep my daughter at home, can I do this?**

We can understand your concerns and we wouldn't open the school if we didn't feel that situation was contained. You will be aware that the government has announced that all students should return to school and continue their education.

**When my youngest son was in contact with someone who has COVID-19, do I place my whole family into self-isolation?**

The guidance is that it is just your youngest son, unless he develops symptoms, in which case your household should self-isolate for 10 days.

**Can children wear masks in school and in classrooms to prevent it?**

In accordance with the current national lockdown, the academy policy on face coverings has been updated so that face masks (if preferred) can be worn in all internal social/communal areas including classrooms.

**My children were told to self-isolate by the school and PHE. How will their free school meals be reimbursed?**

In the government guidance schools have been told that they need to provide either a meal or a food parcel for free school meals pupils if they are isolating. We are arranged food parcels and these were given to eligible students to take home.

**What happens if I don't send my child in?**

We will be in touch to have a conversation and discuss your concerns. All students should now be back at school unless your child is self-isolating. We haven't used fines in these circumstances yet at Ormiston Denes Academy because we have good relationships with our families and hope that through discussion we can encourage students back to school. However it is in the guidance from the government.
